

Update for all Northstar Seed Advisors

Compare two alfalfas to understand the differences,

Ranchers Choice Brand Alfalfa. Maximize the Season!

Alfalfa Comparison	Ranchers Choice Brand	Algonquin or Beaver
Purity	✓	✓
Germination	✓	✓
Seed Treatment	✓	
Increased Inoculant Rate	✓	
Suitability varying soils	✓	
Performance	✓	
Quality	✓	

Advantage Ranchers Choice Brand!

Purity – cleaned to Certified #1 Standards

Germination – meets or exceeds Certified #1 Standards

Seed Treatment – Apron XL, will provide excellent early seedling disease protection.

Increased Inoculation Rate - Rhizoseal Premium, 50% additional inoculant.

Suitability varying soils - Grows best on medium to heavy soils, but adaptable to varying soil conditions.

Performance – Yield should be increased due to increased adaptability.

Quality – Increased quality due to multifoliate alfalfa.
