1-800-805-0765

### Quick Overview

- High multi-leaf expression
- Rapid regrowth
- Superior disease resistance
- Persistence
- Winterhardy

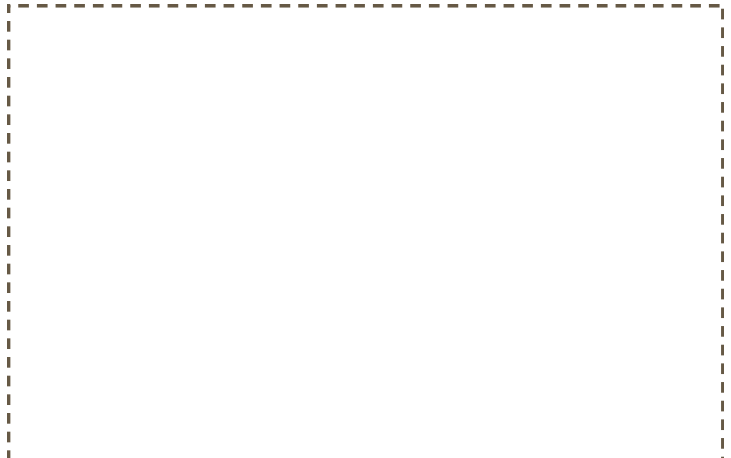

### Adaptation

TH2 key characteristics are high multi-foliolate expression, rapid regrowth and very good winter survival. A top performing alfalfa that is well suited for the majority of alfalfa growers/ conditions in Western Canada. Its re-growth and leafiness should deliver top quality forage production in many situations.

Consider TH2 in a blend with our similar maturity alfalfas or in combination with grasses. Contact your local Northstar Seed Sales Representative to Dealer to further discuss TH2 Alfalfa.
